Continuation of Disposition of Claims: Claims withdrawn from consideration are 22-52,54-56,58-71,77-82,84-86,88-106,108-115,117 and 118.

Art Unit: 1711

DETAILED ACTION

In the case when the claimed aqueous composition of group I is in condition of allowance, then the claims in groups II-V will be rejoined since they are on based on the composition of group I.

Claims 1-6,8-11,15,16,18,19,21-52,54-56,58-71,77-82,84-86,88-106,108-115,117 and 118 are pending.

The rejection over claims 1-6,8-11,15,16,18,19 and 21, under 35 USC 103 (a) in the last office action is hereby withdrawn in view of Applicant's arguments. However, a new ground of rejection is cited herein based on a STN search.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6,8-11,15,16,18,19, and 21 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3 of U.S.

Patent No. 6,586,520. Although the conflicting claims are not identical, they are not

patentably distinct from each other because the only difference between two set of claims is that the claims in the reference do not disclose the instant claim © component.

However, said © component, has not been defined in claim 1, and is used only to increase the claimed properties such as moisture barrier and/or vapor barrier.

Therefore, it would have been obvious to one of ordinary skill in the art to add the © component and its function into the composition in the claims of the reference since the addition of an element and gain of its function from a combination is obvious in the absence of a showing of unexpected results following from such addition See In re Wilson, 153 USPQ 740 (CCPA 19670, exParte Rainu 168 USPQ 375.
